A health savings account (HSA) allows you to save money for qualified medical expenses that you're expecting, such as contact lenses or monthly prescriptions, as well as unexpected ones – this year and for any future needs. It's a win-win for saving on health costs today, tomorrow, and even through retirement.

Check out these highlights:

Call dibs on your money

It's all yours until you spend it – even deposits made by others, like an employer or family member. You keep it, even if you change jobs, health plans or retire.

Save, earn and spend income tax-free (legally)

Yes, that's right. You generally won't pay income taxes on your HSA funds. HSAs put more money in your pocket with income tax-free:

- Contributions to your account (up to the annual limit)
- Interest and potential investment earnings
- Funds used for qualified medical expenses

Why choose an HDHP with HSA?

When choosing between a traditional copay plan (PPO) and a qualifying high deductible health plan (HDHP) paired with an HSA, the HDHP with HSA is often the financial winner. That's because you get tax advantaged savings to cover a variety of qualified medical expenses now and into the future.

This approach typically offers lower premiums and more control of your health care dollars. And if you don't have immediate medical needs, you can save your HSA funds until you do – unused funds are yours to keep for life.

Save on out-of-pocket costs head to toe

Your HSA covers you and your family for a wide variety of qualified products and services like:

- Dental care, including extractions and braces
- Eye exams, glasses and contacts
- LASIK surgery
- Prescription medications
- Foot treatment
- Chiropractic services
- Ultrasounds
- Doctor's office visits and procedures

Go to optumbank.com/QualifiedExpenses to see a searchable list with more eligible expenses.
